ABOUT US

Founded in 2011, PB Projects brings together expertise in civil engineering, structural construction, and design-build services under one practice. We manage the entire project journey from the ground-breaking to handover, bringing design, structural engineering, and site execution together under one roof.

This integrated approach reduces unnecessary complications, keeps costs under control, and helps us deliver projects on schedule, project after project.

Our work is guided by a simple standard: consistently meeting and exceeding our clients' expectations. It is a standard we uphold on every site, with every team, and on every build.

Looking ahead, our aim is straightforward: to be a professional and customer-focused civil engineering and consulting company that clients can rely on, while creating buildings that support long-term, sustainable development.

PB Aakhil

Founder & CEO, PB Projects

FOR MORE

Civil engineering was never just a career choice for me; it was a calling. From my Diploma in Civil Engineering to my M.Tech in Industrial Engineering and Management, every step shaped how I view construction, not merely as a technical process, but as a discipline built on precision, planning, and people.

Over two decades in the industry, along with more than ten years of sharing construction knowledge through my YouTube channel, have taught me that great buildings are never accidents. They are the result of sound engineering, disciplined execution, and a team that refuses to compromise on quality.

This belief led to the founding of PB Projects, with the purpose of bridging the gap between design and reality. Today, my commitment remains the same as it was from the beginning: to deliver work that we are proud to put our name on, built on transparency, accountability, and results.

OUR SERVICE

Turnkey Construction Solutions

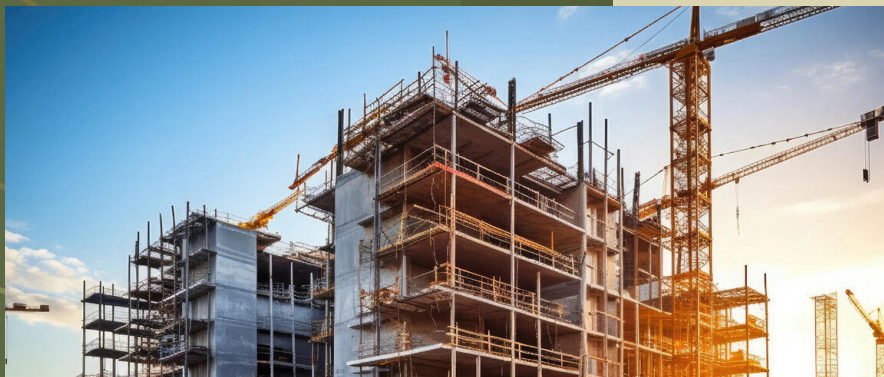

Our turnkey solutions cover every phase of construction—from design and execution to finishing—under one dedicated team. This ensures consistent quality, streamlined coordination, and projects delivered on time, every time.

Infrastructure Development

We deliver heavy civil and structural construction, from foundational groundwork to formwork and casting, built for commercial and institutional buildings that demand strength, precision, and dependable long-term performance.

Industrial Construction & Warehousing

Our industrial construction services cover the design-build of factories and warehouses, combining structural strength with practical planning to create facilities built for performance, safety, and scale.

Interior Design-Build & Execution

We bring homes and workspaces to life through end-to-end interior design-build solutions, combining aesthetic vision with meticulous execution to create spaces that are as functional as they are beautiful.
